Professional Summary

Aspiring Full Stack Developer with practical experience in building and deploying web applications using Java, Spring Boot, React.js, MySQL, and REST APIs. Proficient in backend development, frontend implementation, database integration, and API development. Experienced in developing scalable, maintainable, and secure applications, with a commitment to delivering high-quality software solutions and continuously learning modern web technologies.

Education

Lalaji Memorial Omega International School(CBSE) 84%
Computer Science *2012 – 2024*

Saveetha Engineering College CGPA- 9.4
Bachelor of Engineering, Electronics and Communication Engineering *Sep 2024 – May 2028*

Technical Skills

Languages: Java, C, Python, JavaScript, HTML/CSS
Frameworks: Spring Boot, React, Node.js, Flask, FastAPI
Databases: PostgreSQL, MySQL, MongoDB
Developer Tools: Git, Docker, VS Code, Visual Studio, PyCharm, IntelliJ
Core CS: Data Structure & Algorithms, Object-Oriented Programming, DBMS, REST APIs, Testing, Monitoring

Experience

ESG Sentinel Private Limited July 2026
Full Stack Developer Intern *On-site*

- Developed and maintained scalable backend services for ESGNyan, an enterprise ESG analytics platform, using Node.js, TypeScript, PostgreSQL, and Prisma ORM.
- Designed and implemented RESTful APIs for data management, analytics workflows, and seamless communication between frontend and backend systems.
- Optimized database queries, data processing workflows, and application performance while ensuring secure and reliable data access across multiple modules.
- Collaborated with cross-functional teams to develop, test, and deploy new features, improving application functionality and user experience.

Projects

CrowdFlow | *YOLOv8, ByteTrack, OpenCV, Python, FastAPI, React, Docker*

- Built a real-time AI-powered crowd monitoring system using CCTV feeds for detection, tracking, and movement analysis for public safety applications
- Engineered a persistent ID tracking pipeline using ByteTrack to eliminate duplicate counting and maintain temporal consistency across video frames
- Developed flow-based predictive analytics to estimate crowd congestion trends using real-time movement rates with a live geospatial dashboard for monitoring and alerts

Compensation-Intelligent-System | *React, TypeScript, Prisma, PostgreSQL, Express, Zod, Vite*

- Built a compensation analytics platform for salary benchmarking, role comparison, and market insights using a modern full-stack web application
- Implemented data modeling and persistence using Prisma with PostgreSQL to support compensation records, comparisons, and profile-driven insights
- Added schema validation and data quality checks with Zod to ensure clean, reliable submissions

Civic-Fix | *Spring Boot, JWT, React, MySQL*

- Built a platform for reporting and tracking civic issues with structured user and admin workflows
- Developed REST APIs with JWT-based authentication and role-based access control for secure operations
- Integrated React frontend with backend services for seamless end-to-end functionality

Certifications

Oracle Certified Professional: Java SE 21 Developer 86%

AWS Educate: Machine Learning Foundations

Achievements

Secured 2nd Place in a Chatbot Development Challenge
Sai Ram Engineering College

Ranked among Top 50 teams in a National-Level Hackathon [Techno-A-Thon]
St. Joseph Engineering College
